	While research on new instruments is carried Research Institute at Laipzi, the actual prof instruments is carried on an Ashemia-Telic plent located in the Soviet Sector of Berlin, important accomplishments of the institute had a new field torsion balance. Tests were	rotaction ow. the Askenia-Werk One of the mose is been the devolors of so success.
	Research Institute at Laipzi, the actual prof instruments is carried on an Ashemia-Telicopiant located in the Soviet Sector of Barling important accomplishments of the institute has of a new field torsion balance. Tests were ful that the Askania-Teltow plant has produce for shipment to China. 2. The Askania-Teltow plant is also saking deep-East Zone oceanographic service.	reduction ov. the Askania-Wark One of the more as been the developm of so success d 200 of the instrument tical instruments for the
	Research Institute at Leipzi, the actual prof instruments is carried on at Askenia-Telic plant located in the Soviet Sector of Barling important accomplishments of the institute has of a new field torsion balance. Tests were ful that the Askenia-Teltow plant has produce for shipment to China. 2. The Askenia-Teltow plant is also saking deep-East Zone occanographic service. 3. The Askania-Werke plant at Kielf is making optioned depth maters, and other occanographic inswere given on the quantity of production nor	reduction ov. the Askania-Wark One of the more as been the developm t so success ed 200 of the instrument tical instruments for the struments, but no fi ure
